Portfolio

Summary

Award-winning Software Engineer with 3+ years of practical experience in the Fintech sector, specializing in banking applications and electronic fund transfer (EFT) systems. Expert in Java, with a proven track record of optimizing legacy monolithic systems and developing REST/SOAP web services. Recognized with the Best Performance Award (H2-2023) for exceptional technical delivery and system optimization.

Experience

Software Engineer - AS400, Euronet Software Solutions, Pune — Oct 2025 – Jan 2026

- Customized RPGLE programs for the Electronics Fund Transfer ITM team, demonstrating adaptability beyond core Java expertise.
- Integrated credit card embossing API into EUI for automated credit card production.
- Contributed to global development projects in a product-based MNC financial services environment.

Software Engineer, Euronet Software Solutions, Pune — Jan 2024 – Dec 2024

- Acquired comprehensive expertise in ITM EUI banking web application and AS/400 backend systems.
- Resolved high volumes of Jira stories and customer support tickets across multiple product versions.
- Delivered enhancements for MasterCard Mandates, Client Blacklist, SOAP web services, and CMS product features.
- Utilized Core Java, J2EE, JSF, JavaScript, PrimeFaces, SQL, DB2, REST, SOAP, and JAX-RPC technologies to implement solutions.
- Mentored new developers, providing support for technical queries and onboarding.
- Advanced team debugging and research effectiveness, improving overall system reliability.

Trainee Java Developer, Euronet Software Solutions, Pune — Mar 2022 – Jan 2024

- Developed and maintained ITM EUI monolithic banking web application using JSF framework and DB2 database in an agile Kanban environment.
- Managed EUI screen bug fixes and improvements, addressing Jira stories and customer tickets.
- Resolved code conflicts and performed GitHub version control operations.
- Developed and tested REST web services in RPGLE; validated with Postman and iRPGUnit framework.
- Built expertise in Core Java, JSF, PrimeFaces, DB2, HTML, CSS, JavaScript, AJAX, SQL, REST, and SOAP web services.
- Earned early promotion to Software Engineer for delivering high-quality results on schedule.

System Officer, CGM Pvt. Ltd., Pune — Sep 2021 – Feb 2022

- Generated business reports using ERP, MS Excel, and SQL, supporting daily operational decision-making.

Education

Bachelor in Computer Applications, Dr. D Y Patil Center for Online Learning Aug 2026 – Present | Pune
Specialization in Web Development and Cloud Computing.

Diploma in Computer Engineering 2018 – 2021 | PDEA's Institute of Technology, Pune
Maharashtra State Board of Technical Education
GPA: 3.59 on a scale of 4.0 (89.66%)
Awarded with Gauravchinha Medal in college for academic performance.

Skills

Programming Languages
Java, Python (basic), JavaScript, SQL

Cloud and Technologies
Amazon Web Services, Microservices, REST Web services, SOAP web services.

Dev Tools
Maven, Jenkins, Jira, Confluence, Git, Github, IBM RDi, Intellij IDEA, Eclipse, WebSphere, Postman, SOAPUI, GitHub Actions.

Back-End
Spring framework (Core, MVC, Cloud, REST, Data, JPA, Security, AOP), Spring Boot, Hibernate ORM, JSF framework, JDBC, JUnit, Mockito.

Databases
IBM DB2 stored procedures, complex SQL queries (joins, functions, etc.), PostgreSQL, MySQL, MongoDB.

Knowledge of
CI/CD, Design patterns, Microservices architectures.

Front-End
React.js, JSF, PrimeFaces, Javascript, AJAX, HTML, CSS.

Containerization and Orchestration tools
Docker, Kubernetes.

Soft Skills
Quick learner, Flexible, Strong focus, Team player, Accuracy, Attention to detail.

Achievements

Best Performance Award
Best performance award for H2-2023 (Jun 2023 - Dec 2023).

Gauravchinha medal
Certificate in Diploma for achieving a rank in academics.

Head boy, Soli A. Poonawalla high school
Served as Head Boy and gained leadership skills.

Courses and Certifications

Master Microservices with SpringBoot, Docker, Kubernetes, UDEMY
This course covers the learning and development of Microservices with SpringBoot, Docker, Kubernetes.

Spring & Hibernate for Beginners (Includes Spring Boot), UDEMY
This course covers Spring Boot 3, Spring Framework 6, Spring Boot 3 Core, Spring Boot 3 Annotations, Spring Boot 3 Java Configuration, Spring Boot 3 and Spring MVC, Spring Boot 3 Hibernate/JPA CRUD, Spring Boot 3 Security, Spring Boot 3 REST API and Maven.

Personal Projects

Microservices - EazyBank microservices with config server, gateway server, eureka discovery server etc.
Concepts used: Java, Spring Boot, Microservices architectures, Eureka, Gateway server, and more.

Movies app
Concepts used: Java, Spring Boot, Javascript, React.js, axios, React player, CSS, REST APIs, Mongo Atlas.

College Management System
Concepts used: Java Swing, Java, JDBC, MySQL, Java Mail API.

Professional Projects

- **EUI Access during ICCS EOD -** Prohibited the access of some EUI (Euronet UI) screens during the credit card end-of-day processes.
- **REST web services development, testing and documentation -**
  - REST 5A - Credit Card Maintenance & Inquiry Screens
  - REST 8A - Merchant Maintenance & Inquiry Screens
  - REST Transaction web services
  - REST Mobile Banking web services
  - REST Bill Payment web services
  - REST PIN web services
- **Fall 2022 and Spring 2023 MasterCard mandates -** Implemented and tested the MasterCard mandates for Fall 2022 and Spring 2023 period.
- **EMU Cash Position Match with Green Screen -** Implemented EMU cash position functionality from AS/400 into the EUI.
- **Transaction Volume by Merchant Terminal -** Developed and tested screens for analyzing merchant transactions volume by individual POS terminal.
- **IMS Merchant Processing Methods -** Implemented and tested changes to the merchant processing methods within the IMS (Integrated merchant system) component in the ITM product.
- **Bankmail on EUI -** Implemented Bankmail functionality into EUI (without design document).
- **QTEMP Elimination from SOAP -** Enhanced SOAP web services by optimising SQL queries using SQL functions and eliminating the use of QTEMP library in AS/400 stored procedures to support large number of user requests.
